Seal/Diaphragm/Disk (kit suffix)	EP / Buna / EP (RAN)
Drill & Tap Bosses	None
Solenoid Option	None
Solenoid Feature	None
Approximate Ship Weight (lbs.)	7

HTN / ORIGIN COUNTRY: 8481809030
United States

AquaMatic K52 Series Composite Control Valves are designed to handle deionized water as well as acids, caustic, harsh chemicals or gases that would rapidly corrode metal valves. The valves are constructed of corrosion-resistant materials, but still have all of the advantages of the unparalleled AquaMatic metal body valve design. The K52 Series Valve body and cap are molded with glass-filled thermoplastic.
