SE3 Series Compact Rotary Paddle Point Level Sensor

A⁺fine
Aplus Finetek Sensor, Inc.

PRODUCT INTRODUCTION

PRINCIPLE

The SE3 series is a compact rotary paddle point level sensor that uses a robust synchronous drive motor to rotate a stainless steel shaft at approximately 1 rpm. A paddle actuating mechanism is attached to the stainless steel shaft inside of the bin or hopper that the SE3 is mounted on. A clutch mechanism is also a key component with the SE3 assembly. With the target material not present at the units paddle inside the bin, the paddle will rotate freely and the internal switch output will be in its starting position and the internal LED will illuminate Green indicating that the paddle is rotating free of material. When material is in contact with the paddle inside the bin or hopper the clutch will disengage, the switch output changes state, the motor power is disconnected internally and the Red LED illuminates indicating material presence.

FEATURES

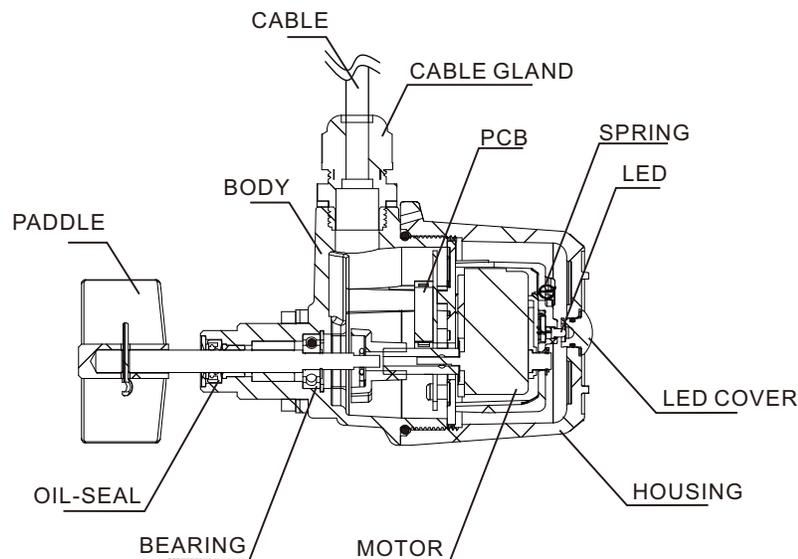

- Compact robust design fits virtually anywhere
- Unique bi-color LED (Green/Red) for local indication of material presence/absence
- Standard, reinforced extended shaft and high temperature versions available
- Easily adjusted sensitivity if required
- Folding stainless steel paddle affords installation without internal bin access

INDUSTRY USE AND APPLICATIONS

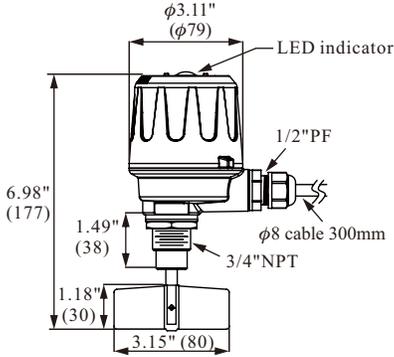

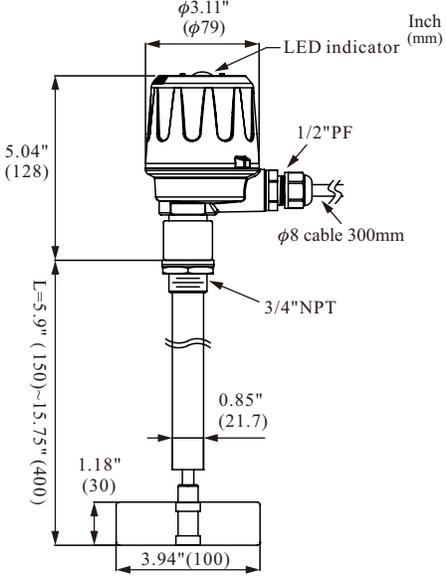

The SE3 series includes an adjustable sensitivity spring to allow it to be used in a wide range of applications with its available paddles. In addition, the wide operating temperature range makes the SE3 series a great fit for a variety of applications including within the following industries or type of facilities:

- Plastic Processing
- Food & Ingredients
- Pharmaceutical
- Specialty Chemical
- Wood Processing
- Foam and Fiber Production
- Grain Processing
- Many Others

|-------------------|---|--|-----------------------------------|--|
| Dimensions | Inch (mm) | | Inch (mm) | |
| | | | | |
| Type | High Temperature Standard | | High Temperature Reinforced Shaft | |
| Order no. | SE3814 | | SE3815 | |
| Ambient temp. | -40°F~-185°F (-40°C~85°C) | | | |
| Storage temp. | -40°F~-185°F (-40°C~85°C) | | | |
| Process temp. | -40°F~-392°F (-40°C~200°C) | | | |
| Relative humidity | 20%~80% RH non-condensed | | | |
| Pressure | 58psi (4 bar) | | | |
| Housing material | Diecast Aluminum (powder coated) | | | |
| Protection | NEMA 4X / IP65 | | | |
| Connection | 3/4"NPT | | | |
| Conduit entrance | One 1/2"G | | | |
| Paddle speed | 1 RPM | | | |
| Supply voltage | 24VAC, 110VAC, 220VAC, 240VAC 50/60Hz, 24VDC | | | |
| Output rating | One Microswitch SPDT, 5A @ 250Vac/30Vdc | | | |
| Power consumption | Max. : 1.5W | | | |
| Bulk density | 18~62lbs/ft ³ (0.3~1g/cm ³) | | | |
| Sensitivity | Adjustable Torque: Weakest, Weak, Strong, Strongest | | | |
| LED Indication | Material Absent – Green, Material Present – Red | | | |

TYPES OF ACCESSORIES

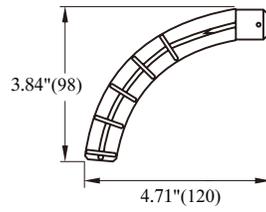

PADDLES – DIRECT CONNECT (ATTACH BY USING PIN ONLY)

G SEB-1192

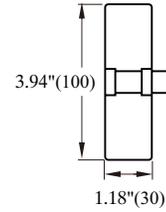

Material: Polycarbonate

H SEB-1193

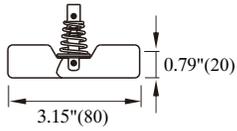

Material: Polycarbonate

I SEB-1194

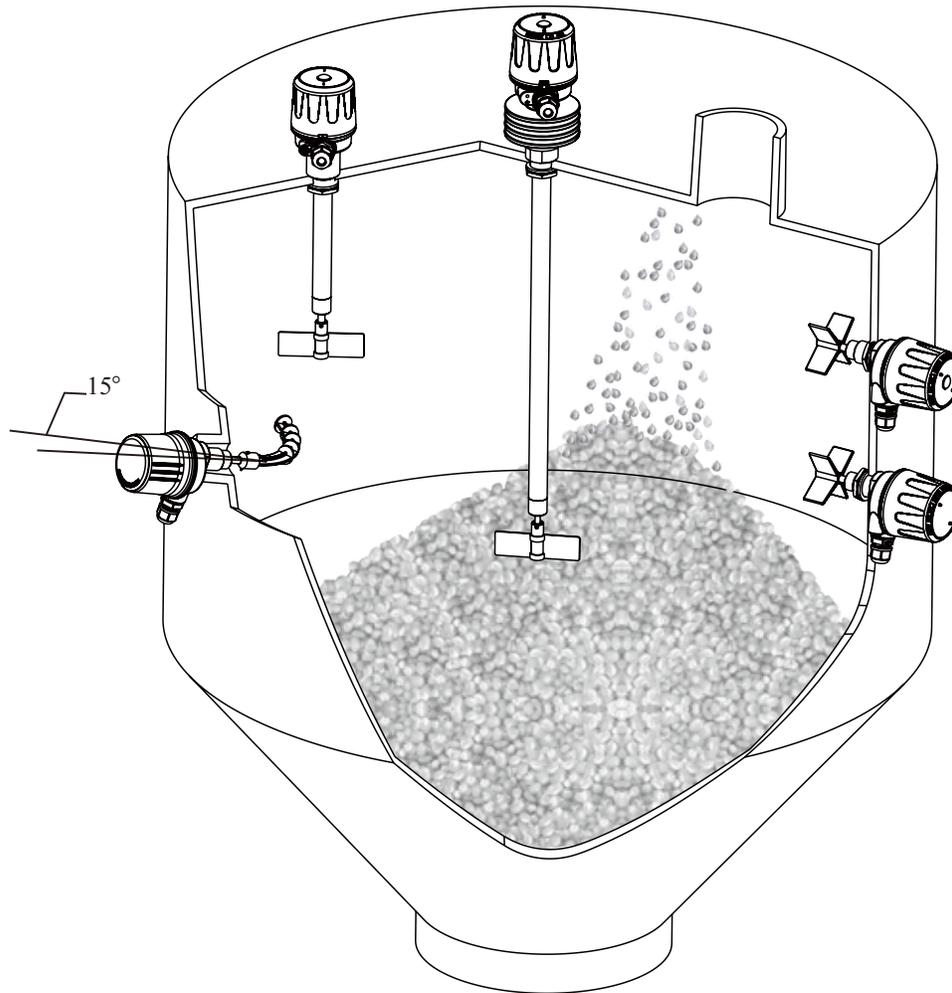

Material: Stainless steel

K EB-0192

Material: Stainless steel

INSTALLATION

NOTES

- For side mount installation do not install where paddle and shaft will be in the direct flow stream of incoming material during filling.
- Conduit opening should always be positioned downward with conduit or cable connection tight and sealed to prevent ingress of moisture through conduit/cable connection.
- Always disconnect power from unit power source before opening enclosure or prior to initial installation.
- Consult factory when internal bin environment may be highly corrosive to aluminum process connection. Stainless steel or other material for the process connection may be available.
- Ensure that the internal bin and ambient temperatures do not exceed the unit specifications.

ORDER INFORMATION

SE3 ()

Enclosure Type _____

- 7: Explosionproof version
- 8: Nonexplosionproof version

Enclosure Cover _____

- 0: Aluminum without lens
- 1: Aluminum with LED lens *
- 2: Plastic *
- * Selections 1 and 2 are not available for use with explosionproof SE37 version

Model _____

- 0: Standard
- 2: Reinforced Shaft
- 4: High Temperature Standard
- 5: High Temperature Reinforced Shaft

Power _____

- A: 110Vac, 50/60Hz
- B: 220Vac, 50/60Hz
- C: 240Vac, 50/60Hz
- D: 24Vac, 50/60Hz
- E: 24Vdc

Process Connection _____

- | | |
|----------------|------------------------|
| Threaded: | Flanged: |
| CU: 3/4" NPT | EO: 1-1/2" ANSI 150lbs |
| DU: 1" NPT | FO: 2" ANSI 150lbs |
| 3U: 1-1/4" NPT | HO: 3" ANSI 150lbs |
| EU: 1-1/2" NPT | IO: 4" ANSI 150lbs |
| FU: 2" NPT | KO: 6" ANSI 150lbs |
| SS: Special | |

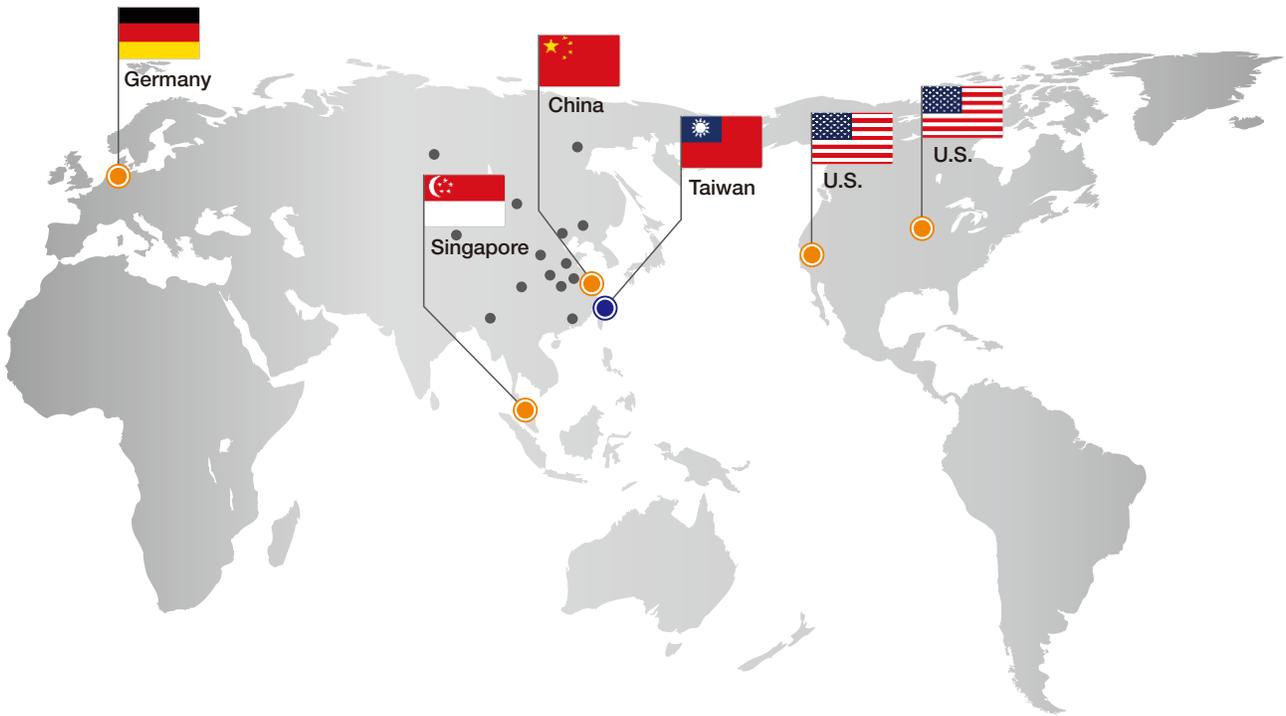

Paddle _____

- : No paddle (Purchase Paddle Separately as Accessory)
- G: 4-Vane Cross Paddle (polycarbonate plastic)
- H: 1-Vane "banana" Paddle (polycarbonate plastic)
- I: 2-Vane Paddle (stainless steel)
- K: 2-Vane Folding Paddle (stainless steel)

Electrical Cable Length * _____

- 0500: Below 20" (500mm)
- 1000: Range from 20" to 39" (501~1000mm)
- 1500: Range from 40" to 59" (1001~1500mm)
- 2000: Range from 60" to 79" (1501~2000mm)
- 2500: Range from 80" to 98" (2001~2500mm)
- 3000: Range from 99" to 118" (2501~3000mm)
- 3500: Range from 119" to 138" (3001~3500mm)
- 4000: Range from 139" to 157" (3501~4000mm)
- S: Special
- * Standard length is 11.8" (300mm)
